

# INFRASTRUCTURE DISASTER MANAGEMENT CERTIFICATE PROGRAM

This program provides the emergency management community a deep dive into key sub-sectors of Critical Infrastructure.

DHS/FEMA-funded courses

**Disaster Management for Public Services:** <https://dmfps.eventbrite.com>

Cook County Emergency Operations Center, 15900 S Cicero, Oak Forest, IL 60452  
May 7 - 8, 2018, 8:00 AM - 5:00 PM,

**Disaster Preparedness for Hospitals & Healthcare Orgs within the Community**

<https://dphh.eventbrite.com>

Cook County Emergency Operations Center, 15900 S Cicero, Oak Forest, IL 60452  
July 10 -11, 2018, 8:00 - 5:00 PM

**Disaster Management for Water and Wastewater Utilities:** <https://dmww.eventbrite.com>

Cook County Emergency Operations Center | 15900 S Cicero | Oak Forest, IL 60452  
September 5 -6, 2018 - 8:00 AM - 5:00 PM

**Disaster Management for Electric Power Systems:** <https://dmeps.eventbrite.com>

Cook County Emergency Operations Center | 15900 S Cicero | Oak Forest, IL 60452  
September 26 - 27, 2018 - 8:00 AM - 5:00 PM

# **INFRASTRUCTURE DISASTER MANAGEMENT** **CERTIFICATE PROGRAM**

<https://dhsem-fire-ems-em-training.eventbrite.com>

## **DISASTER MANAGEMENT FOR PUBLIC SERVICES — MGT-317**

With this training, public service stakeholders including those from the City Staff, Public Works, Utilities, and Emergency Management can extend their knowledge and skills for protecting their communities and critical infrastructure (CI) from potential or actual threats. During this course, participants work together in multidisciplinary teams to apply the course information with their professional experience in a variety of hands-on, small group activities, and disaster scenarios.

## **DISASTER PREPAREDNESS FOR HOSPITALS AND HEALTHCARE ORGANIZATIONS WITHIN THE COMMUNITY INFRASTRUCTURE — MGT-341**

The National Infrastructure Protection Plan (NIPP) identified hospitals and healthcare organizations as CI. This course brings planning and management stakeholders from the hospital and healthcare sector together with supporting community leaders to ensure the resiliency of healthcare infrastructure services in the event of a high-consequence event. Participants will examine preparedness processes and activities, sector dependencies and interdependencies, and discuss resiliency strategies to ensure the sustainability of these facilities and organizations.

## **DISASTER MANAGEMENT FOR ELECTRIC POWER SYSTEMS — MGT-345**

Electric power systems provide an enabling function across all critical infrastructure sectors. In our connected world, interruptions in electric service threaten the whole community. This course brings together internal and external stakeholders from the electric power utility and emergency management community who are responsible for ensuring the resiliency of the Nation's electric power systems during a high consequence or catastrophic event within a jurisdiction.

## **DISASTER MANAGEMENT FOR WATER & WASTEWATER UTILITIES - MGT-343**

The NIPP identified water and wastewater (WW) systems as CI. These systems are vital to the communities' public health and economic development. The interdependencies between WW, other CI sectors, and emergency management necessitate a common understanding by stakeholders of water sector impacts. We will guide you through issues concerning preparing for, responding to, mitigating, and recovering from incidents affecting WW facilities.

Participants completing all four Critical Infrastructural Disaster Management courses are eligible to apply for the Infrastructure Disaster Management Certificate. Recipients will receive a 10x13 certificate of Professional Recognition suitable for framing. There is no cost for the program.
